Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The Petricevic reference discloses a fiber reinforced carbon aerogel that is produced by the process comprising: providing a solution of organic precursor aerogel that includes resorcinol and formaldehyde; adding a ceramic fibre or carbon fibre to the precursor to form a precursor mixture; gelling the precursor mixture; drying the composite gel in air; and pyrolyzing the composite gel to form an aerogel/carbon composite (See Experimental). However, Petricevic does not expressly teach a transition metal oxide catalyst. Since Gartside discloses a process for creating olefinic hydrocarbons that is different than forming aerogels or xerogels, the result of using Gartside's catalyst with Petricevic's process is unpredictable. In addition, the transition metal oxide catalyst is construed as being present in the final anode monolith product.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony Chuo whose telephone number is (571)272-0717. The examiner can normally be reached on M-F, 7:00AM to 3:30PM.
